# **Bash Scripting Knowledge Check Solutions**

#### **Course Outline**

- 1. Variables
- 2. Arithmetic
- 3. Comparisons and Operators
- 4. If Statements
- 5. If / Else If / Else Statements
- 6. For Loops
- 7. While Loops

#### **Variables**

```
#!/bin/bash
MY_STR="Hi there!"
echo 'My string is: $MY_STR'
echo "My string is: $MY_STR"
```

1. What will be the first line output by this script?

```
My string is: Hi there!
```

2. What will be the second line output by this script?

```
My string is: $MY_STR
```

./example\_script 0 1 2

```
#!/bin/bash
echo $0
echo "Printing $3, $2, $1"
echo $#
```

3. What will be the first line output by this script?

```
./example_script
```

4. What will be the second line output by this script?

```
Printing 2, 1, 0
```

5. What will be the third line output by this script?

3

#### **Arithmetic**

```
./example_script 2 3
```

```
let "num_1 = $1 * $2"
echo $num_1
expr $1 \* $2
expr $1 * $2
num_2=$(( num_1 / $1 ))
echo $num_2
```

	What will be the first line output by this script?
	2
	☑ 6
	Error
2.	What will be the second line output by this script?
	2
	☑ 6
	Error
2	What will be the third line output by this script?
٥.	
	2
	3
	6
	☑ Error
4.	What will be the fourth line output by this script?
	☑ 2
	3
	6
	Error
	#!/bin/bash
	expr \$RANDOM % 100
5	What will this script output?
	What will this script output:
0.	
0.	A random number between 0 and 100
	A random number between 0 and 100
	A random number between 0 and 100
Co	A random number between 0 and 100  Omparisons and Operators
Co	A random number between 0 and 100  Omparisons and Operators  #!/bin/bash
C	A random number between 0 and 100  Omparisons and Operators  #!/bin/bash [ -z \$1 ]
C	A random number between 0 and 100  Omparisons and Operators  #!/bin/bash
C	A random number between 0 and 100  Omparisons and Operators  #!/bin/bash [ -z \$1 ]
C	A random number between 0 and 100  Omparisons and Operators  #!/bin/bash [ -z \$1 ]
C	A random number between 0 and 100  omparisons and Operators  #!/bin/bash [ -z \$1 ] echo \$?
C	#!/bin/bash [-z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello
C	#!/bin/bash [-z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello  0 1
C	#!/bin/bash [-z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello
C	#!/bin/bash [-z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello  0 1
1.	#!/bin/bash [-z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello  0 1 Hello No output
1.	#!/bin/bash [-z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello  0
1.	#!/bin/bash [-z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello    1     Hello   No output  What is the output if the script is called like so?: ./example_script    0     1     Hello   No output  What is the output if the script is called like so?: ./example_script    0
1.	#!/bin/bash [-z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello 0   1   Hello No output What is the output if the script is called like so?: ./example_script 0   1   Hello No output What is the output if the script is called like so?: ./example_script 0   0   1
1.	#!/bin/bash [-z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello    1     Hello   No output  What is the output if the script is called like so?: ./example_script    0     1     Hello   No output  What is the output if the script is called like so?: ./example_script    0
1.	Discription of the script is called like so?: ./example_script Hello    No output   Hello   No output   Hello   No output   Hello   He
1.	#!/bin/bash [-z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello 0   1   Hello No output What is the output if the script is called like so?: ./example_script 0   1   Hello No output What is the output if the script is called like so?: ./example_script 0   0   1
1.	##/bin/bash [ -z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello
1.	Discription of the script is called like so?: ./example_script Hello    No output   Hello   No output   Hello   No output   Hello   He
1.	##/bin/bash [ -z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello
1. 2.	#!/bin/bash [-2 \$1] echo \$?  What is the output if the script is called like so?: ./example_script Hello 0 1 Hello No output What is the output if the script is called like so?: ./example_script Hello No output What is the output if the script is called like so?: ./example_script 0 Vexample_script No output What is the output if the script is called like so?: ./example_script No output Statements
1. 2.	##/bin/bash [ -z \$1 ] echo \$?  What is the output if the script is called like so?: ./example_script Hello

```
if [ $num_a != $num_b ]
then
  echo "$num_a and $num_b are not the same"
fi
```

What is the output of this script?

1000 and 1001 are not the same

No output

### If / Else If / Else Statements

```
#!/etc/bash
if [ $1 -gt $2 ]
then
   echo "$1"
elif [ $2 -gt $1 ]
then
   echo "$2"
else
   echo "--"
fi
```

What does this script do?

It prints the larger of the two numbers provided, or '--' if they are the same

## For Loops

```
#!/bin/bash
for val in {1..10}
do
  echo $val
done
```

1. What will be the first line output by this script?

1

2. What will be the fifth line output by this script?

5

./example\_script /usr

```
#!/bin/bash
for entry in $(ls $1)
do
  echo $entry
done
```

- What will be the first line output by this script?It depends on the OS distribution but probably bin
- 4. Briefly describe what this script is doing It prints out each entry in the given directory

## While Loops

```
#!/bin/bash
counter=5
while [ counter -gt 0]
do
   echo $counter
done
```

1. What will be the first line output by this script?

5

2. What will be the fifth line output by this script?

5; there is no decrement changing the counter so this will loop forever.

```
#!/bin/bash
counter=1
while [ $counter -lt 20]
do
   echo $counter
   if [ $(($counter % 2)) -eq 0]; then
      echo "even"
   fi
   let "counter = counter + 1"
done
```

3. What will be the fourth line output by this script?

3

4. What is the sixth line output by this script?

even
